

YASHENDRA SINGH

Agentic AI Engineer | Full Stack Developer (MERN)

Kanpur Nagar, U.P., India

☎ [+91-8004944879](tel:+91-8004944879) ✉ singhyashendra321@gmail.com 🔗 [linkedin.com/in/yashendra-singh8931](https://www.linkedin.com/in/yashendra-singh8931)

PROFESSIONAL SUMMARY

Agentic AI Engineer and MERN Stack Developer with **1+ years** of experience building scalable Node.js services, LLM-powered Generative AI agents, and full-stack (React.js) applications. Skilled in **RAG pipelines, prompt engineering**, Azure cloud integration (AI Foundry, Logic Apps, Databricks), and enterprise workflow automation across healthcare and logistics domains.

PROFESSIONAL EXPERIENCE

LeewayHertz / The Hackett Group

Feb 2025 – Present

Software Engineer – Full Stack and AI

Remote, India

- Deliver end-to-end full-stack and AI solutions across **2 live enterprise platforms**, shipping releases every **2-week sprint** and completing full project cycles in **2-3 months** from requirement analysis through deployment.
- Design and build scalable architectures using **Node.js, React.js, MySQL, Prisma ORM**, and **20+ REST APIs**, merged with Azure cloud services (Logic Apps, Function Apps, AI Foundry).
- Build responsive **React.js** frontend interfaces (**10-15 reusable components**) connected to backend APIs and AI workflows across **2 live platforms**, delivering seamless end-to-end user experiences.
- Develop and orchestrate **Agentic AI** agents using Generative AI and Azure AI Foundry, achieving **98%+ extraction accuracy** across **30+ page** documents for intelligent document processing and decision workflows.
- Optimized database schemas and queries, cutting API response time from **15s to under 10s (35%+ faster)**; defined system architecture, data models, and integration strategies for high-performance delivery.
- Authored and maintained REST API documentation across **20+ endpoints**; produced technical documentation for APIs, workflows, and system designs, supporting **2 successful production releases** to date.

KEY PROJECTS

AI-Powered Invoice Processing Agent – Enterprise Healthcare Client | Full Stack & AI Engineer (Current)

- Owned full-stack delivery of the platform – building **AI agents, backend services, and frontend features** end-to-end.
- Engineered AI agents for medical invoice ingestion, extraction, validation, and classification using **Generative AI and Azure AI Foundry**; achieved **98% extraction accuracy** across multi-invoice documents of **30+ pages**.
- Built an **automated data sync pipeline** pulling updated data from **Databricks into SQL**, replacing manual refresh and powering real-time UI updates.
- Integrated **SAP via SAP BTP and Psinova**, converting validated invoices into structured **XML payloads after exception handling**, enabling seamless data exchange between the AI pipeline and enterprise ERP.
- Ensured healthcare compliance throughout – data accuracy, security, and regulatory alignment across all backend services.

HRJD: AI-Powered Job Description Platform – Enterprise Logistics Client | Backend and AI Developer

- Handled end-to-end development of a **live, production-grade AI platform for Job Description (JD) creation and verification**; took full ownership from architecture design to delivery.
- Incorporated **ZBrain (in-house AI product)** flows into the backend to power intelligent JD generation; enabled **bulk processing of 100+ JDs simultaneously** with AI-driven validation.
- Built scalable backend services using **Node.js, Prisma ORM, MySQL, and REST APIs**; engineered data models and integration strategies aligned with enterprise requirements.
- Built **React.js** frontend features and resolved UI bugs alongside backend development, ensuring a seamless end-to-end user experience.

TECHNICAL SKILLS

Languages: JavaScript (Node.js), Python, SQL

Backend and APIs: Node.js, REST APIs, Prisma ORM, MongoDB, MySQL, Postman

Agentic AI and LLM: Agentic AI Systems, LLM Integration, RAG Pipelines, Prompt Engineering, Generative AI Integration, ZBrain, Azure AI Foundry, Azure AI Agents

Cloud and Automation: Azure Function Apps, Azure Logic Apps, Azure Databricks, Docker

Frontend: React.js, HTML, CSS, JavaScript, Tailwind CSS

DevOps and Collaboration: Git, GitHub, Bitbucket, Azure DevOps, Jira

Concepts: System Architecture Design, Microservices, Event-Driven Architecture, REST API Design, Agile Methodologies, Unit Testing (Jest, Mocha)

EDUCATION

Lovely Professional University

Aug 2023 – Jun 2025

Master of Computer Applications (MCA) – 8.0 CGPA

Punjab, India

Dr. Virendra Swarup Institute of Computer Applications

June 2020 – May 2023

Bachelor of Computer Applications (BCA) – 73.25%

Kanpur, India
